Dear Harold,

Did they think Ruby wanted be in the grave? Pure disinformation. David

A guy named Gerrow just wrote a book called The F.B.I. and Martin Luther King, Jr. Ray is not even in the index! Very definitive! It got publicity in Newsweek by putting out the K.G.B. mole in F.B.I. line. Anglelon must be giving a lot of briefings.

Lattimer's book is trash and one has to wonder the publisher's (H.B.J.) motives.

"It was apparent (and acknowledged by him) that The Warren Commission Artist drew them from instructions and without the advantage of seeing the Body, the photographs or the X-rays."

Thus, Lattimer's book raises questions and answers none.

Bobby claims Mob killed R.F.K., also. Breading etc. Early Ruby got pay off money. Exile Cubans, Renegade C.I.A. agents also participated. Mob may have instituted D.J.

Joe Kennedy and Mob made J.F.K. President. Killed him when he wouldn't go along. Sinatra, Early Ruby, McWillie, Marcello, Trafficante, Dolan, Baker, Weiner, William

Haines, Dolan, Farris etc. And he said Garrison was irresponsible. Bakers Barrows Bradly Bromberg quite a range of Conspiracy theories. An unoriginal paranoid.

You really should write a memoir of "The Who Killed Kennedy?" Circus, the other critics, the unpublished aspects (Bakers, your aborting of "Accents" in 1968 etc.) of the Garrison probe, the issues, the personalities, your research, the D.A., battles etc. You're the only man who could write it.

Already, one can watch the conspiracy theories being re-cycled and gaining credence with the younger generation.

No book has been written which tells the extraordinary story of how private citizens and a local D.A. investigated a presidential murder. It's one hell of a story.

Sincerely,
